

EasyDisposal = high efficiency + safety

The ATTIX 7-ED is perfect for users who need big capacity and features that focus on efficiency. Our most silent vacuum ever, with superior suction performance, Easy Disposal, automatic filter cleaning, anti-static capability and more. The 2M ED is the perfect solution for M-Class Hazardous Dust.

The EasyDisposal (ED) model is perfect for building and construction applications since the 'container' is an external disposal bag which can be replaced in seconds so you can continue your work. The EasyDisposal bag found on the ATTIX 7-ED allows you to work a very long time without walking around a container to empty it, and when necessary, you will simply change the bag and dispose it after the job is finished, extremely convenient and time-saving.

Operating costs are minimized with the washable PET Fleece filter elements, and the low working noise level lets you work when others are nearby, without disturbing them.

Automatic On/Off models are the choice of people who use the machine with electric hand tools because starting or stopping the tool starts and stops the vacuum, as well. An accessory Airbox is available which performs the same function when using pneumatic tools.

PRODUCT FACTS

- ATTIX 763 2M ED is approved for use with M Class Hazardous Dust.
- XtremeClean fully automatic filter cleaning system takes care of filter cleaning tasks in just a few seconds without interrupting your work for a second.
- Washable PET Fleece filter for high efficiency and low maintenance costs.
- SilentPower. High performance that is seen, but not heard.
- EasyDisposal Bag allows you to finish your work without taking your container out to empty it, saves time and works efficiently.
